- Interior Table
- Camping Table and Chairs
- Bedding and Towels
- Standard Inventory for self-catering
- Detachable Tow Bar

Note b: Operate when hooked up to campsite power.

Isla joined our hire fleet of 1970's VW T2 campers in 2017, Having been converted into a campervan by Custom Camper Solutions, near Market Harborough in the early Spring of that year. Her body kit, suspension lowering, Side bars and Sportline alloys had all been added by the independent VW service garage that we bought her from (VanTech, Uckfield). At the time, Isla had 68,982 miles on the clock. Over our 7 years of ownership, Isla has averaged 3,400 miles per year, with a total now at 93,574 miles. Dry stored each winter, Isla has been away from salty roads since 2017. At the time of our purchase, we confirmed that the service history was complete, which it was, with services at 21,428 / 31,181, 44,113, 56,364 and 68,982 miles. Isla is a Long Wheelbase VW T32 Trendline 114PS T5.1 Transporter. Other than the main conversion, which included a high-quality Titan M1 crash tested rock and roll bed (which now has a comfy mattress topper) we also fitted an awning rail, Solar Panel, detachable Westfalia Towbar, and a Quartix Tracker was fitted for security. Isla has rear parking sensors, aircon, cruise control, hill hold assist, auto stop / start and a tailgate at the rear. We have just fitted a brand new Kiravans double seat swivel base, and we have also just fitted a new rear exhaust silencer as this was an advisory on her last MOT. Check out any other points of note, on the maintenance list.

Vehicle Tax £351.75
