Note b: Operate when hooked up to campsite power.

Dylan has been a part of the IOW Campers fleet since 2018. With one previous owner, and a superbly comprehensive Cordwallis VW Dealer service history, he was purchased in late 2017 with 105,000 miles on the clock. His conversion was carried out in the Spring of 2018 by Custom Camper Solutions, who had previously converted our manual T5.1, which is also for sale. Dylan has just over 130,000 miles on the clock, so on average he has travelled 3,500 miles per year whilst we have owned him. Dry stored in the winter, and always with a full tank of diesel, Dylan is still looking great and driving as expected for a quality VW T30 Highline Van. Dylan has a Titan M1 crash tested bed with a mattress topper, Kiravans Double seat swivel, Wallas XC Duo cooker / van heater, Awning Rail and a stainless-steel exhaust system. This is in addition to being a DSG automatic, long wheel based, tailgate van. Front seats are leather, and the rock n roll bed has matched vinyl for easy cleaning. Oil servicing has been approx. every 5,000 miles and cambelt / water pump was last done in March 2024, only 22,000 miles since the last change. Dylan will be sold with a fresh MOT.

Vehicle Tax £147/yr

Check [MOT History on RV10DCF](#)
